

IPS Cable Simulation

Software for design and simulation of cables and hoses

Capability

- ➔ *Real time deformations of cables, hoses and complex wiring harnesses*
- ➔ *Various material types, cross-section profiles, and kinematical clips.*
- ➔ *Analysis of forces, moments and critical clearances*

Benefits

- ➔ *Power (accurate physics)*
- ➔ *Speed (Real time simulation)*
- ➔ *Easy to use (one day crash course)*

Results

- ➔ *Used by industry since 2007*
- ➔ *Outstanding in benchmarks*

IPS Flexible Materials™

IPS Cable Simulation

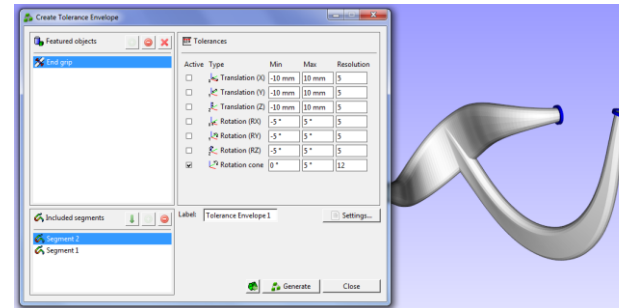

Simulation with cables and hoses

Easy creation and handling of cables and hoses

- Easy creation of cables and hoses using Nodes, Mount frames and Grips
- Kinematic Clips for realistic simulation
- Contact handling (*external – internal*)
- Component Libraries
- Clip Libraries
- Analyze

Envelope possibilities

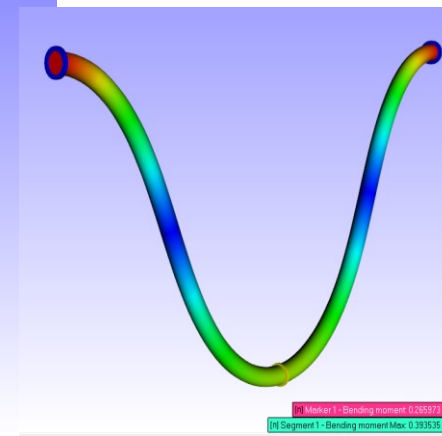

- **Tolerance Envelope:** Generate envelope for tolerance on mounting angle
- **Motion Envelope**
- **Motion Sweep**

Hose simulation during engine movements

- Wake up CAD geometry
- Create new optimized proposals
- Create hoses, cables and harnesses with correct material properties
- Drag and drop for connection to rigid bodies
- Simulate motion
- Analyze

Easy visualization and measuring

- Visualization of forces and moments
- Value measurements of forces and moments
- Analyze
- Optimize
